OBJECTIVE | I'm a full stack web developer with over a year of professional experience. I'm skilled at adapting to new technologies. I'm looking for a job opportunity that will stretch my full stack knowledge and give me more industry experience in a tech focused company.

WORK | SOFTWARE DEVELOPER AT ATLAS FINANCIAL HOLDINGS
JULY 2017 – PRESENT

- Building application as a full stack developer with SQL Server Management Studio 2017, ASP.NET MVC 5, Razor, and custom JavaScript in the commercial car insurance industry.
- Creating and modifying full stack applications with complex business rules for departments like IT, HR, Accounting, Operations, and Underwriting
- Developing dashboards views, forms, and APIs to display company wide metrics

INTERNSHIPS | RESEARCH ASSISTANT AT DEPAUL UNIVERSITY
JUNE 2016 – JANUARY 2017

- Worked under Dr. Karen Heart to build a database security system. Queries were analyzed and sent to admins for approval.
- Built the server/proxy with Python. Designed GUI's with the wxPython library.

RESEARCH ASSISTANT AT DEPAUL UNIVERSITY
AUGUST 2015 – DECEMBER 2015

- Worked under Dr. Jane Cleland-Huang with 2 team members to build a natural language query engine.
- Manipulated SQL queries using C# & fixed display errors

EDUCATION | DEPAUL UNIVERSITY, CHICAGO
B.S. IN COMPUTER SCIENCE

GPA: 3.82

Dean's List all quarters | Nation Society of Collegiate Scholars Member

INTERESTS | In the future, I'd like to build web apps in a modern front end framework like React or Vue, learn to build scalable systems with cloud services, or even just gain more knowledge on various topics like caching, NoSQL, and CI.

EXAMPLE OF WORK | Here is a video of some web development projects I've worked on recently:
